Q. Discuss dictionary creation methods

→ To create a dictionary in python:

Dictionary items have (key -value) pair values can be of any data type and can repeat, keys must be of immutable type and must be unique.

✱ Empty Dictionary

my-dict = { }

✱ Empty Dictionary using dict()

my-dict = dict()

✱ Dictionary with integer keys

my-dict = { 1: "apple", 2: "ball"}

✱ from sequence

my-dict = dict([(1, 'apple'), (2, 'ball')])
